EDUCATION

Parul University

B.Tech in Computer Science and Engineering

Dhangadhi, Kailali, Nepal

2023 – 2027 | CGPA: 7.64

PROJECTS

Wanderlust — Property Hosting & Rental Platform

[Live](#) | [GitHub](#)

Node.js · Express.js · MongoDB · EJS · Bootstrap · Passport.js · Cloudinary · Mapbox

A production-deployed, full-stack property rental marketplace built on the MVC pattern. Users can list, search, filter, and review properties with secure authentication, cloud media storage, and interactive geolocation maps, handling real-world traffic on Render and MongoDB Atlas.

- Architected 15+ REST API endpoints following MVC architecture; launched the platform on Render and MongoDB Atlas, sustaining 100+ concurrent sessions with sub-300ms average API response time.
- Engineered compound MongoDB indexes on location, price, and category fields, reducing property-filter query latency by approx. 40% versus a collection-scan baseline.
- Implemented Passport.js and Express-session authentication with route-level authorization guards, securing all protected resources against unauthorized access.
- Built a Multer + Cloudinary media pipeline processing 500+ image uploads with automatic WebP optimization; integrated Mapbox GL for geolocation-indexed property maps.

CareOS — Doctor Appointment & Telemedicine Platform

[Live](#) | [GitHub](#)

React.js · Node.js · Express.js · MongoDB · Tailwind CSS · ZegoCloud · JWT

A MERN-stack telemedicine platform with real-time video consultations, appointment booking, and secure role-based access control across three user roles (Admin, Doctor, Patient), integrating ZegoCloud WebRTC and stateless JWT-based RBAC, hosted on Vercel.

- Engineered real-time video consultations using ZegoCloud WebRTC, serving 50+ active users across Admin, Doctor, and Patient role types.
- Designed stateless JWT authentication with RBAC middleware, eliminating unauthorized cross-role data access across all 10+ secured API endpoints.
- Optimized appointment-listing queries via a MongoDB aggregation pipeline, cutting database round-trips from $O(n)$ to $O(1)$ by eliminating $N+1$ query patterns.
- Abstracted ZegoCloud, Cloudinary, and Mapbox into reusable service modules, reducing code duplication by approximately 30% and improving maintainability.

ACHIEVEMENTS & COMPETITIVE PROGRAMMING

- Solved 1025+ DSA problems across LeetCode, GeeksforGeeks, HackerRank, Codeforces, and CodeChef.
- Achieved a peak LeetCode contest rating of 1668 (max 1580) across 30+ rated contests; current CodeChef rating of 1384 (max 1386) with participation in 17 rated contests.
- Maintained a 266+ day coding streak and earned 7 achievement badges on Codolio.
- Awarded the Smart Coder Diamond Certificate by Smart Interviews for outstanding performance in competitive programming.

TECHNICAL SKILLS

- **Languages:** C, C++, JavaScript (ES6+)
- **Frontend:** React.js, Tailwind CSS, Bootstrap, HTML5, CSS3

- **Backend:** Node.js, Express.js, REST APIs, MVC Architecture, Redis
- **Databases:** MongoDB (Aggregation, Indexing), MySQL, Mongoose ODM
- **Authentication & Security:** JWT, Passport.js, Session Management, bcrypt
- **Cloud & DevOps:** AWS (Cloud Practitioner), Docker, MongoDB Atlas, Render, Vercel, Git, GitHub, Postman
- **Core CS Concepts:** Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks

CERTIFICATIONS

- IBM: Artificial Intelligence Fundamentals
- AWS: Cloud Practitioner Essentials & Academy Cloud Foundations
- Smart Interviews: Smart Coder — Diamond Certificate
